Analysis Projects

1. Give the intro about the domain : in 3 lines
2. Give the Introduction about the project: in 2 lines.
3. Objective of the project: explain it in 2 lines.
4. ELT Approach (if any)- talk about the process
5. Data Migration (if any): explain about the data transfer from MongoDB to SQL
6. EDA: talk about your findings
7. Feature engineering (if any)
8. Statistical Technique (if any) - talk about the tests – mention the test name and why you choose that. – 1 or 2 lines
9. Conclusion: summarize the key findings of the project.
10. Business suggestion/solution

The explanation should be in 1 or 2 lines. And you should be clear about why did you choose those techniques for your project.

Text-Extraction Projects

1. Introduction about the project- explain in 2 lines.
2. Objective of the project- explain in 2 lines.
3. Text extraction: Image cleaning, OCR – explain about the process
4. Text cleaning – explain about the techniques used

5. Data storage- Explain about the process of storing
6. Conclusion: summarize the key findings of the project.
7. Business suggestion/solution

The explanation should be in 1 or 2 lines. And you should be clear about why did you choose those techniques for your project

Model Building Projects

1. Give the intro about the domain : in 3 lines
2. Problem statement – explain in 1 line
3. Data cleaning and preprocessing – null value imputation, outliers etc., - just explain what are the techniques you used here.
4. EDA – univariate, bivariate, multivariate analysis – talk about your findings in 1 or 2 lines
5. Feature engineering (if any)
6. Statistical significance – talk about the tests – mention the test name and why you choose that. – 1 or 2 lines
7. Class imbalance technique (if any)
8. Model building – base model - why did you choose
9. Talk about the models that you used in your project – why did you choose those algorithms (hyper parameter tuning – if any)
10. Model evaluation metric – why did you choose that metric
11. Final model- why did you select that as your final model
12. Conclusion – feature importance
13. Business suggestion/solution

The explanation should be in 1 or 2 lines. And you should be clear about why did you choose those techniques for your project
